

E-invoicing is all about ease and transparency. It increases the efficiency in internal and external processes and decreases the chances of data misrepresentation every step of the way.

**UAB GET Baltic invites all clients to start a digital journey with the implementation of e-invoicing.**

As the first step GET Baltic has chosen integration with the Finnish software company Basware. All customers, using Basware as a service provider have been contacted in order to ensure smooth invoicing procedures change. If your e-invoicing service provider is Basware and you were not contacted yet, please let us know.

**For further e-invoicing development, GET Baltic invites all customers who are interested in receiving invoices via e-invoicing solution to contact us.**
